

# A Report on Connotea

Ian Mulvany, Connotea Product Development Manager,  
Nature Publishing Group

Thank you for you  
Attention

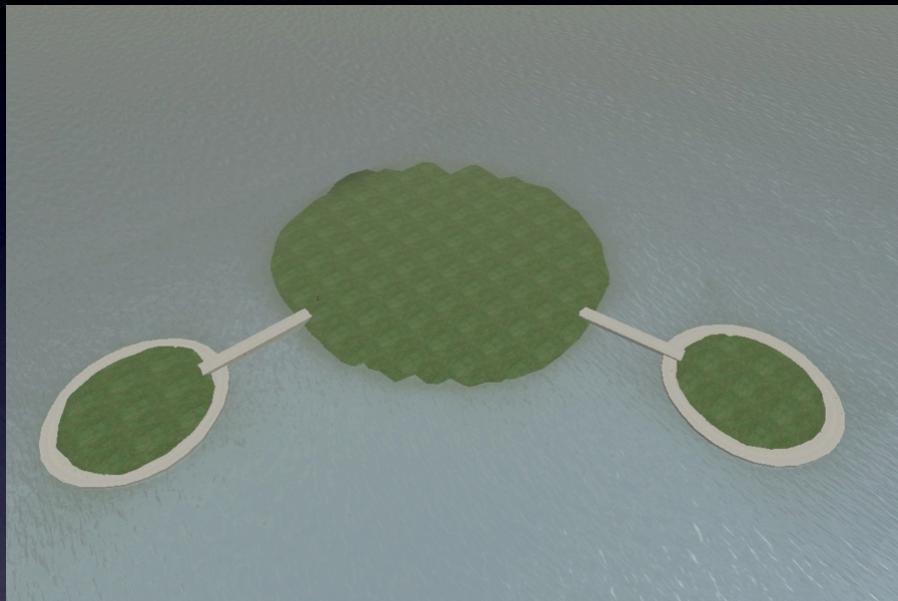

Nature Web Publishing  
group

# Nature Web Publishing group

OTMI

# Second ~~Life~~ Nature

## Free online reference management for all researchers, clinicians and scientists

Completely free, no download

→ sign up now

Welcome back, IanMulvany.

My Library  
 Logout

### How it works

Find

You find a reference

Save

One click saves it on Connotea

Customize

Add your own keywords for easy retrieval

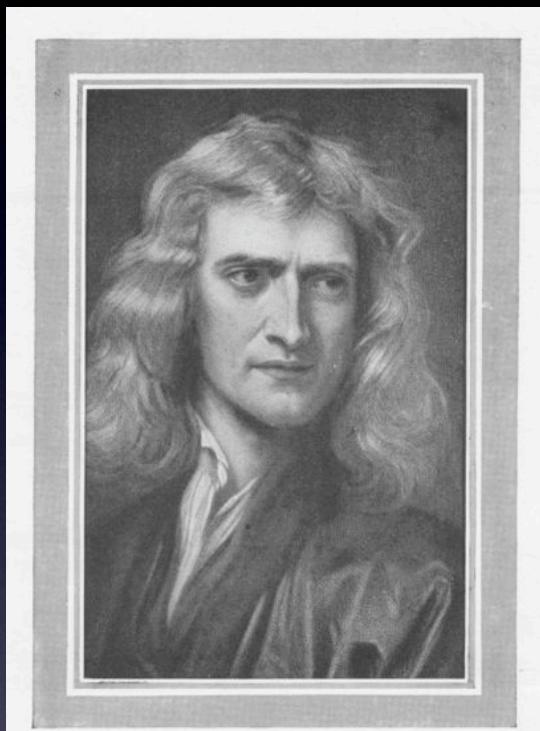

The screenshot shows a search results page for the tag 'cancer'. The results list a single item: 'Israel developed anthrax vaccine over Israel threat' from www.alphynet.org. The page includes a sidebar with user statistics and a toolbox for managing bookmarks and groups.

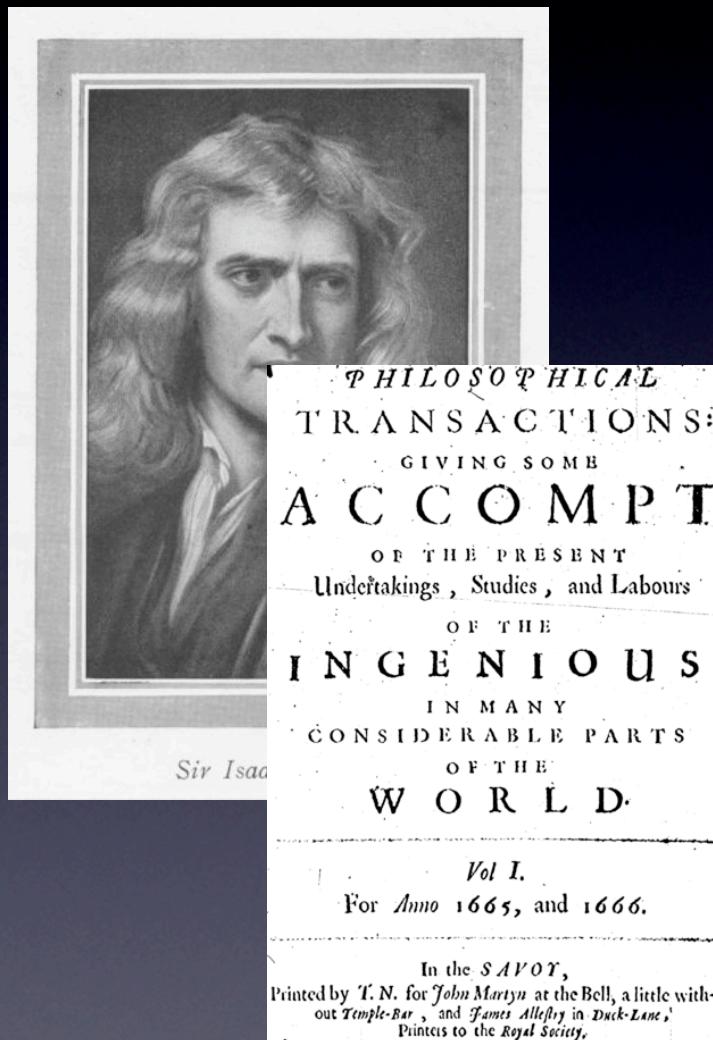

### Five reasons to use Connotea

1. Save and organize links to your references
  2. Easily share references with colleagues
  3. Access references from any computer
  4. One click is all it takes
  5. Easy to use. Start creating your library today
- [Learn more](#)

*Sir Isaac Newton*

Vol I.  
For Anno 1665, and 1666.

In the SAVOY,  
Printed by T. N. for John Martyn at the Bell, a little without  
out Temple-Bar, and James Allestry in Duck-Lane,  
Printers to the Royal Society.

Sir Isaac

PHILOSOPHICAL  
TRANSACTIONS:  
GIVING SOME  
ACCOMPT  
OF THE PRESENT  
Undertakings, Studies, and Labours  
OF THE  
INGENIOUS  
IN MANY  
CONSIDERABLE PARTS  
OF THE  
WORLD.

Vol I.

For Anno 1665, and 1666.

In the SAVOY,  
Printed by T. N. for John Martyn at the Bell, a little without  
out Temple-Bar, and James Allestry in Duck-Lane,  
Printers to the Royal Society.

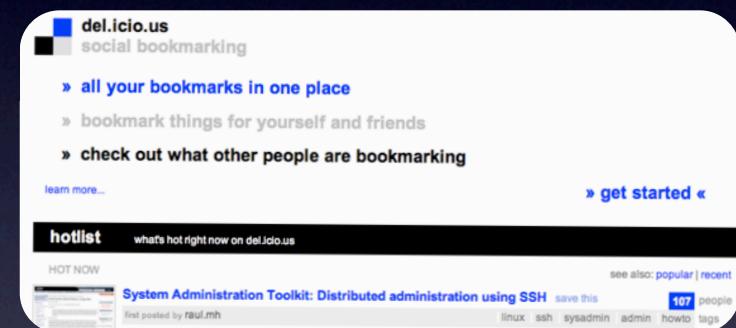

# History behind Connotea

Deliciously scientific

Timo Hannay, Ben Lund, Martin Flack (Neo Reality)

# Social Bookmarking

- del.icio.us founded by Joshua Schachter in 2003, acquired by Yahoo in Dec, 2005
- Key features of this service:
  - save bookmarks online
  - add tags
  - simple url structure to retrieve data via tags
  - tags provide folksonomy over bookmarks
  - many users allow searching links by popularity

# Examples of del.icio.us url's

<http://www.del.icio.us/popular/Elsevier>

The screenshot shows the del.icio.us interface displaying popular items tagged with 'Elsevier'. The page header includes the del.icio.us logo and the search terms 'popular / Elsevier'. Below the header, a message indicates 'Popular items tagged Elsevier (create tag description) → view all'. The main content area lists several items, each with a title, a 'save this' link, the poster, the posting date, the number of saves, and the number of recent saves. The items listed are:

- Elsevier.com [save this](#)

Immunolocalization of the High-Mobility Group N2 protein and acetylated histone H3K14 in early developing parthenogenetic bovine embryos derived from oocytes of high and low developmental competence.

**Bastos GM, Gonçalves PB, Bordignon V.**

Laboratory of Biotechnology and Animal Reproduction—BioRep, Federal University of Santa Maria, Santa Maria, RS, Brazil.

This study investigated differences in the distribution of acetylated histone H3 at Lysine 14 (H3K14ac) and the High-Mobility Group N2 (HMGN2) protein in the chromatin of early- (before 24 hr) and late-cleaved (after 24 hr) bovine embryos derived from small- (1–2 mm) and large-follicles (4–8 mm). The

Immunolocalization of the High-Mobility Group N2 protein and acetylated histone H3K14 in early developing parthenogenetic bovine embryos derived from oocytes of high and low developmental competence.

Bastos GM, Gonçalves PB, Bordignon V.

Laboratory of Biotechnology and Animal Reproduction—BioRep, Federal University of Santa Maria, Santa Maria, RS, Brazil.

This study investigated differences in the distribution of acetylated histone H3 at Lysine 14 (H3K14ac) and the High-Mobility Group N2 (HMGN2) protein in the chromatin of early- (before 24 hr) and late-cleaved (after 24 hr) bovine embryos derived from small- (1–2 mm) and large-follicles (4–8 mm). The

“What I keep hearing is, how can we impact factorize open science. Well, the answer is, you can't. Let's stop trying to find some magic algorithm whereby a machine tells us what quality science is. What's completely mad to me about this is that we already have processes to assess science quality. Every time you review a new student, every time you look at a grant proposal, heck, even on the infamous tenure committees and research assessments, a group of humans looks at a portfolio of existing or proposed work, and decides whether it is good enough.

So if I may modestly propose, let's continue to do that, and no one other than journal publishers should ever look at impact factor numbers again. Arise, qualitative assessment, begone quantitative nonsense.”

- Richard Akerman

# Citation Analysis?

People have personal search algorithms, some  
good some bad

Social bookmarking sites are often write only

By making collections public and tagged you  
provide a resource

For example I read what my boss is tagging

This is kind of an orthogonal use case for these  
kinds of services, even before we add in more  
complex algorithms

Collaboration  
Serendipitous discovery  
Storage  
Manage (tagging)  
Recommendations  
(algorithmic)  
Don't want to give a false  
positive

## Add to Connotea from Journal Pages

If you regularly read journal Table of Contents pages and want an easy way to keep track of papers you find interesting, you may want to try my "[Add to Connotea](#)" Greasemonkey script.

A screenshot of a journal article page. The title is "Atypical Protonation States in the Active Site of HIV-1 Protease: A Computational Study" by Paul Czodrowski, Christoph A. Sotriffer, and Gerhard Hiebe. Below the title is the text "Web Release Date: 16-May-2007; (Article) DOI: [10.1021/ci600522c](https://doi.org/10.1021/ci600522c)". To the right of the DOI is a small blue diamond-shaped icon with a white letter 'C' and the number '1' next to it. At the bottom of the screenshot, there is some handwritten-style text.

To use it, you first need to have a [Connotea](#) account. When you navigate to a journal web page for the first time after you have started your browser, you will need to enter your Connotea username and password.

The script adds an "Add to Connotea" link next to every DOI on journal pages. If you click on this, a dialog box appears that allows you to bookmark the paper on Connotea. A useful feature is the ability to quickly select from tags that you have already used. The "Add to Connotea" script also displays a count of the number of people who have already bookmarked a particular paper. If you click on this number, it will bring you to the Connotea page for that paper.

### Materials science: Stirring stuff

David J. Pine<sup>1</sup>

**Take silicon, soak in water, add acid — and stir. This simple new recipe for the self-assembly of complex microstructures belies an involved sequence of hydrophobic, electrostatic and van der Waals interactions.**

In folding its proteins and constructing its complex membranes, nature uses self-assembly: bathed in water or another liquid, tiny building-blocks come together by virtue of their shape and interactions. As they report in the journal *Small*, Onoe et al.<sup>1</sup> adapt these natural processes for their own designs. They describe a method for assembling parts just 10 micrometres across into complex, three-dimensional objects.

On speciesism. Genomicron 2 days ago

There has been a lot of discussion on the science blogs about "animal rights" recently. Most of the argument has centered around whether animals are necessary for research, but of course the animal rights movement includes issues such as factory farming, using animals for entertainment, the pet industry, and others.

The paperless PhD business|bytes|genes|molecules 1 day ago

Back when we thought about putting Bioscreencast together, we had a vision of people doing their daily work, realizing that there was something interesting to share, turning on their favorite screencasting app, and then recording a screencast. Today, Michael Pascoe uploaded a screencast that, for me, personifies that vision.
