The New Metrics of Scholarly Authority

- Prestige of the publisher.
- Prestige of peer pre-reviewers.
- Prestige of commenters and other participants.
- Percentage of a document quoted in other documents.
- Raw links to the document.
- Valued links, in which the values of the linker and all his or her other links are also considered.
- Obvious attention: discussions in blogspace, comments in posts, re-clarification, and continued discussion.
- Nature of the language in comments: positive, negative, interconnective, expanded, clarified, reinterpreted.
- Quality of the context: What else is on the site that holds the document, and what's its authority status?

continued . . .

INTELLIGENT TELEVISION

The New Metrics of Scholarly Authority

…continued

- Percentage of phrases that are valued by a disciplinary community.
- Quality of author's institutional affiliations.
- Significance of author's other work.
- Amount of author's participation in other valued projects, as commenter, editor, etc.
- Reference network: the significance rating of all the texts the author has touched, viewed, read.
- Length of time a document has existed.
- Inclusion of a document in lists of "best of," in syllabi, indexes, and other human-selected distillations.
- Types of tags assigned to it, the terms used, the authority of the taggers, the authority of the tagging system.
