PREMIS Entity	Element Name	Subelement/Attribute Name	Definition	Value example 1	Value example 2	Comments
Event	eventIdentifier		A designation used to uniquely identify the event within the preservation repository system.			Container
		eventIdentifierType	A designation of the domain within which the event identifier is unique.	Validation	SDR_FGDCMetadata_Conversion	
		eventIdentifierValue	The value of the eventIdentifier.	SDR Ingest Validation	E-2005-9963733	
	eventType		A categorization of the nature of the event.	Validation	Normalization	
	eventDateTime		The single date and time, or date and time range, at or during which the event occurred.	2005-11-27-08:00	2005-12-12T02:48:22<	
	eventDetail		Additional information about the event.	ValidationResults	XML Conversion	Not designed to be machine readable.
	eventOutcomeInformation		Information about the outcome of an event.			Container
		eventOutcome	A categorization of the overall result of the event in terms of success, partial success, or failure.	Pass	n.a.	
		eventOutcomeDetail	A non-coded detailed description of the result or product of the event.		FGDC metadata received from data provider was transformed into an xml file for purposes of normalizing into a Stanford Digital Repository-supported file format for metadata as part of the conversion workflow.	Event schema defines this subelement as an "any" element allowing any valid XML to be included within.
		ingestValidation/ID	UUID of file assigned by SDR	FILE_07108e3e-5fd1-11da-b211-19e7a5cf4814	sdrConversion ID="FGD_XML"	SDR defined
		ingestValidation/JhoveOutput	Narrative representation of the results of the Jhove output.	File is of format: PDF. The file is well-formed. The file is valid.		SDR defined
		ingestValidation/SDR_IngestValidatorOutp	Narrative representation of the results of the SDR ingest module validation activities.	The computed checksum matches the original checksum for file [file:90990250/90990250.pdf]		SDR defined: repeatable
				Original file ID : FILE_99002859 has been changed to FILE_07108e3e-5fd1-11da-b211-19e7a5cf4814		SDR defined: repeatable
				Original file name 90990250/90990250.pdf has been changed to FILE_07108e3e-5fd1-11da-b211-19e7a5cf4814.pdf		SDR defined: repeatable
	linkingAgentIdentifier		Information about an agent associated with an event.			Container
		linkingAgentIdentifierType	A designation of the domain in which the linking agent identifier is unique.	SDR_Software	SDR_Software	
		linkingAgentIdentifierValue	The value of the linking agent identifier.	SDR_Ingest_Validator_v1	SDR_Conversion	
	linkingObjectIDentifier		Information about an object associated with an event.	n.a.		Container
		linkingObjectIdentifierType	A designation of the domain in which the linking object identifier is unique.	n.a.	DASC_FILE_NAME	
		linkingObjectIdentifierValue	The value of the linking object identifier.	n.a.	0903.xml	This is the XML file that is the output of the normalization.
